# STEP BY STEP INSTRUCTIONS

## ALL ABOUT ME MATH CRAFT

This All About Me math craft is a fun way to celebrate students and it makes an adorable bulletin board for the classroom.

Included in this resource are craft templates with step by step directions with pictures. There are several options for face and hair. Your students can choose which one they like to use. As a fun keepsake, cut a piece of string to measure students' height and tape it onto the craft.

To get started, copy or trace the craft template onto correct colored paper. You can also copy the template onto white copy paper and have your students color it directly.

## HOW TO ASSEMBLE

### Step three:

Cut out the head and hands and glue the head on top of the flipbook. If using the face pattern without eyes, students can draw the eyes and smile on with marker or crayon.

### Step four:

Next, glue the hands above the flipbook to look like they are holding the paper. Make sure they're not covering up any of the words.

## HOW TO ASSEMBLE

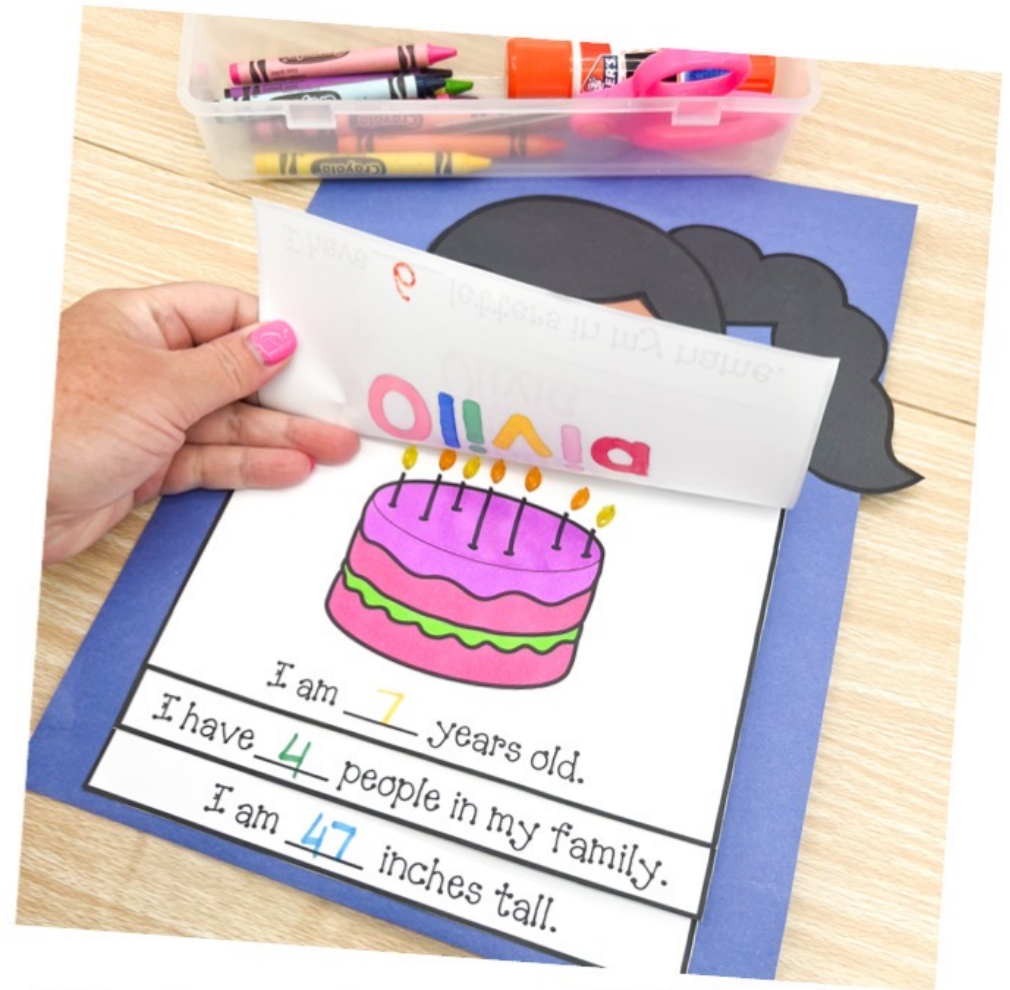

### Step five:

Finally, cut out the hair and glue it onto the head and/or background. Hang the completed craft around your classroom and enjoy!
